

Adhesive, Sealing and Assembly Agent, 120g (Art. 80610)

**PRO +**

- for gluing wood, metals and plastics with and among each other
- usable in metal sheet processing, e.g. car body building, apparatus engineering, boat construction
- overpaintable and permanently elastic
- suitable for wet use
- color: white
- UV-, weather-, saltwater- and chlorine resistant
- very good adhesion on many substrates
- rapid curing, low shrinkage
- processing temperature +5°C to +30°C
- processing time: 10 min.
- density: 1.4 g/ml (DIN 53479)
- curing time: 3mm/24h
- temperature resistant from -40°C to +100°C, shortly up to +130°C
- skin formation: 10-15 min. (23°C 55% RH)
- hardness Shore A: 60 (DIN 53505)
- max. joint width: 25 mm
- elongation at break: 300%
- tensile strength: 2.2 MPa
