

Magnetic welding guns

A sets of 2 magnetic angles used for welding works and assembly of various elements (at an angle): sheets, fasteners, flat bars, profiles, pipes etc. They ensure secure holding of welded elements – thanks to strong magnets.

- holding force: 25 kg (YT-08722), 32 kg (YT-08723)
- application at the following angles: 30°, 60° and 90°
- made of steel
- they provide free access to the welded elements
