

## Safety glasses

For eye protection during manual and mechanical operations, such as grinding, drilling, chiselling, etc.

- glasses made of durable polycarbonate
- colourless
- they fulfil the requirements of EN 166 standard

### YT-73632

- optical class: 1 (the highest quality of visual field, recommended for continuous work)
- mechanical strength: S (they endure the steel particle blow of diameter of 2 mm, mass of 43 g and speed of 12 m/s)
- regulated arm length

### YT-73634

- optical class: 2 (recommended for works without special optical requirements)
- mechanical strength: F (they endure the steel particle blow of diameter of 6 mm, mass of 0,86 g and speed of 45 m/s)
