

Spray gun

80903

Intended for paints, varnishes and impregnates. Enables quick surface coating with the use of HVLP technology. The stream of high-pressure compressed air ensures thorough coating, without the mist effect. It can be used for water spray cleaning or compressed air drying of small items.

- standard 1.8 mm nozzle
- stream width: 200–250 mm
- working pressure: 3–4 Bar
- air consumption:
7 CFM = 198 L/minute
- tank with capacity of 1 L
- convenient, easy-to-handle grip
- standard connection
