

Belt sander

YT-82240

Compact belt sander designed for sanding wooden, metal and plastic elements. It is ideal for surface finishing, removal of corrosion, varnish and paint. The narrow front roller is perfect for working in confined spaces, e.g. balusters, balustrades, fence rails, garden furniture.

- *tilting front cover enables sanding of hard-to-reach surfaces*
- *smooth adjustment of the belt movement enables to adjust the appropriate grinding speed to the processed surface*
- *external access to carbon brushes facilitates their control and quick replacement*
- *drive on V-ribbed belt*
- *small dimensions facilitate work in uncomfortable positions, e.g. over head or outstretched hands*
- *adjustable non-slip additional handle makes work easier*
