

Low-vibration jigsaw

YT-82274

Jigsaw with vibration damping system that significantly increases the comfort of work. It enables to cut round and irregular holes. Moreover, it allows plunge cutting and long straight cutting with perpendicular edges.

|----------------------|-------------------|-------------------------------|
| 450 W | 220-240V~ 50Hz | 500-3100 min ⁻¹ |
| 45° | 6 mm | 65 mm |
| BLADE LOW VIBRATIONS | | |

- U-type blade
- smooth speed control 500-3100 rpm
- locking button during continuous operation
- the pendulum function significantly increases the speed of rectilinear work (I-III position) or cutting in a circle (position 0), when the saw blade makes only vertical movement

- maximum cutting depth: wood: 65 mm, steel: 6 mm
- even and durable steel foot
- transparent blade guard
- 3 m long rubber cable
- included blade, wrench, guide, spare brushes
- the possibility of using the blades: YT-3435, YT-3440-YT-3444
