

Low-vibration jigsaw

YT-82273

Professional jigsaw designed for precise circular and straight cuts. The unique vibration damping system causes that vibrations are almost imperceptible by the user – therefore, the work is safe and comfortable. It enables to cut round and irregular holes. Moreover, it allows plunge cutting and long straight cutting with perpendicular edges.

- made of steel and duralumin castings, which significantly increase the tool's durability
- it easily cuts dry and wet hardwood, and even 12 mm HEA/HEB I-beams (with a wall thickness of 12 mm)
- it is perfect for cutting sheet metal and cellular polycarbonate or sandwich panels
- chip blowing function
- foot cover (made of PVC) protects surfaces from scratches

- the pendulum function significantly increases the speed of rectilinear work (I-III position) or cutting in a circle (position 0), when the saw blade makes only vertical movement
- flat and durable base
- tool-free adjustment of cutting angle
- maximum cutting depth: steel: 10 mm, plastic: 20 mm, wood: 130 mm
- packed in a suitcase
- strong rubber cable with a length of 3 meters
- the set includes blade, blade guard, wrench, guide
- the possibility of using the following blades: YT-3400-YT-3405, YT-3407-YT-3410, YT-3417, YT-3445
