

## Router bits for metal

**HSS  
4241**

Router bits for handling steel and aluminum. Intended for treating profile edges, shaping hole geometry, milling, deburring, weld treatment.

- precision made of high quality quick-cutting HSS 4241 steel, ensuring excellent quality and rate of material cutting
- max. rotational speed: 30000 RPM
- clamping grip diameter: 6 mm
- total length: 55 mm
- working part length: 25 mm
- intended for use with straight grinders (electric and pneumatic)

YATO 	SHAPE	Ø (mm)
YT-61714	cylindrical	13
YT-61715	rounded cylindrical	13
YT-61716	conical	13
YT-61717	bulb	13
YT-61718	pointed	13
YT-61719	narrow cylindrical	6
