

Convenient angle grinder

YT-82097

Features the narrowest „slim body” housing on the market, ensuring a secure grip and thus high convenience and safety of use. Intended for grinding and cutting metal and minerals.

- perfectly fitting gearbox with hardness of 53–56 HRC
- copper winding protected against overheating
- durable and convenient side on/off switch
- short gearbox housing facilitates working at places that are difficult to access and ensures excellent visibility while cutting
- rotor and gearbox cooling air circulation protects the device against penetration by dust
- thick rubber cable with length of 3 m
