

Air tight tool cases

Air-tight and water-, dust- and shock-proof tool cases, protecting the equipment stored against corrosion and damage. Fitted with a decompression valve. Intended for storage of tools, photographic equipment and measuring equipment. They work excellently as transport container in sailing, off-road motorsports etc.

- made of elastic polypropylene
- filled with foam with many incisions, which enables independent adjustment of recesses to one's own tools
- air-tight knob for manual adjustment of pressure
- resilient locking clamps, resistant to impact
- adjusted to locking with a padlock
- IP55 protection class
- the YT-08905 model is additionally fitted with wheels and retractable handle
