

Mitre saw

YT-82175

Professional mitre saw with a feed and 305 mm disc for straight and angular cutting of large elements (columns, purlins, joists). Useful during construction works. It provides precise and fast processing of materials with large cross-sections.

- stable base with precise vertical and horizontal cutting angle adjustment
- lateral extendable brackets facilitate cutting of longitudinal elements
- laser cut line indicator
- bearing feed of the cutting disc
- smoothly operating tilting blade guard (integrated with a switch)
- clamp integrated with the base ensures safe and quick immobilization of the processed material
- readable angle scale ensures precise cutting and stable settings
- option of using a chip bag or connecting a vacuum cleaner
- compact dimensions and transport handle in the central part of the housing ensure proper balance and easy transport
- the set includes: chip bag, disc (305 x 30 x 40T)
