

## Set of Percussion Attachments

YT-10563

6-piece set of long percussion attachments designed for removal of aluminium rims. Recommended for automotive service and tyre service workshops.

- made of durable CrMo steel, resistant to strokes
- ultrathin and long walls make it possible to undo screws in tight rim sockets
- featuring protective sleeve made of soft plastic, which protects the rims from damages to lacquer coating
- provide for easy release of attachments and screws
- galvanized finishing in 3 colours facilitate distinction of sizes
- sizes: 17, 19 and 21 mm
- long reach thanks to the length of 150 mm
- 3 replaceable sleeves
- chuck: 1/2"
- packed in a handy case
