COMPOSITE  
BODY

- Twin Hammer mechanism guarantees efficient tightening and makes it possible to reach high torque with little demand for compressed air
- robust composite materials body
- max. torque: 850 Nm
- max. rotational speed: 6,800 RPM
- air consumption: 350 l/min
- torque regulation
- right/left direction of revolutions toggle switch
- ergonomic design and low weight of 2.5 kg provide for comfortable work
- chuck: 1/2"
