

## 27-piece Radiator Pressure and Cooling System Tester (Art. 98098)

- for leakage test and filling of cooling systems
- facilitates the detection of leaks and allows easy, bubble-free filling even on difficult to fill cooling systems
- includes:
  - 1x pressure pump
  - 1x thermometer
  - 1x filling hose
  - 1x filling unit with vacuum gauge
  - 2x radiator cap adapters, for testing of leakage and opening pressure of radiator caps
  - 3x radiator adapters, for leakage test & filling, suitable for many vehicles with radiator caps
  - 15x adapters for compensating tanks, for leakage test & filling, suitable for almost all vehicles with a compensating tanks
  - 1x ring spanner for tightening / loosening the adaptors

Technical modifications reserved - we are not responsible for issues while printing
