

Pneumatic plastering machine for walls

09900

Pneumatic plastering machine designed for rapid spraying of various types of mortars on walls: gypsum, lime, lime-cement, traditional and renovation plasters with aggregate diameters up to 6 mm. It ensures accurate coverage of the surface.

- capacity: 4 l
- high efficiency: 50 m²/h
- compressor capacity: 400 l/min
- 4 discharge nozzles
- adjustment of spraying force in the handle grip
- pressure: 0.4-0.6 MPa
- light, aluminum construction with a weight of 2 kg facilitates operation, especially in hard to reach places
- comfortable, profiled handle
- quick and easy cleaning
- the set includes a connector for connecting the device to the pneumatic system
