

Solar LED lamp with a spike

YT-81880

Intended for illumination of outdoor locations: paths, terraces and gardens, as well as plants and decorations. The position of the lamp and the solar panel can be adjusted freely.

- 4 efficient LEDs with low power consumption
- IP44 tightness class ensures good protection in outdoor conditions
- light flux with power of 180 lumen
- colour: 6000 K
- high capacity Li-Ion battery ensures long illumination time
- automatic activation and deactivation of lamp thanks to a dusk sensor
- lamp position adjustment by means of a dial with a lock
- illumination angle: 120°
- 2 different intensity illumination modes
- remains efficient for about 500 charging cycles
- can be installed on a spike or directly on a wall
