

Thread sealing cords

Intended for sealing steel threaded connections in hydraulic, central heating and pneumatic systems.

- made of polyamide with high tensile strength
- cords provide immediate sealing that does not require curing
- possibility of adjusting the connection by up to 45°
- resistant to temperature within the range from -20°C to 130°C
- cutting blade fitted in the cord cover
- permitted to come in contact with potable water

max. 15 bar

-20°C~
+130°C

RE-ADJUSTING
JOINS UP TO
45°
