

Lubricator for pneumatic tools

81570

It ensures automatic lubrication of pneumatic tools, improving their efficiency and prolonging life. Installed directly in front of pneumatic tools, it sprays the oil mist, reducing wear and tear of internal elements of the pneumatic system and protecting them against corrosion.

- transparent plastic shield, resistant to impact
- standard connections (air inlet and outlet): 1/4"

5 ml	0.8 MPa (max.)	G1/4
