

Pneumatic oil drain and evacuator

YT-07190

The professional oil drain and evacuator with a control tank enables to quickly empty oil from car engines and transmissions. It is used for draining oil and operating fluids from cars, motorcycles and agricultural machinery.

- 70 l tank
- 10 l control tank
- wide funnel with a capacity of 10 liters
- thorough draining of residual oil from pipes and tubes
- working pressure: 8 bar
- suction pressure: 0.7-0.8 MPa
- emptying pressure: 0.18 MPa
- air consumption: 90 l/min
- equipped with 4 wheels, including 2 swivel wheels, facilitating the movement of the device
- height: 150 cm
- a holder for storing suction probes helps to keep order and cleanliness in the workplace
- the set includes 6 suction probes – 4 flexible and 2 metal – suitable for most car models
